BIRLA PIVOT Bathware

Introducing Birla Pivot Bathware, an innovative line of CP fittings including faucets, mixers, showers, bathroom essentials and accessories, revolutionizing bathroom aesthetics for both commercial and residential spaces worldwide. Our extensive catalogue offers a diverse array of products in various styles and designs, ensuring that every bathroom reflects individual taste and preference. From sleek and modern to timeless classics, our range caters to diverse aesthetic sensibilities.

Committed to uncompromising quality, our products are manufactured under stringent measures to guarantee durability and longevity. Our collection is crafted with precision and attention to detail, ensuring both functionality and aesthetic appeal. With a focus on innovation, our products feature advanced technologies and materials, delivering superior performance and reliability.

Elevate your bathroom space with Birla Pivot Bathware, where quality meets innovation for a truly exceptional experience.

BIRLA PIVOT BATHWARE – ELEGANCE THAT MAKES THE DIFFERENCE

DURABILITY

7-Step chrome finish for long lasting shine & cartridges of Hydroplast or similar brand ensures longer operating cycles.

LONG LIFE

Rigorous testing of cartridges for 10 lacs cycles gives trouble free operating life for upto 20 years.

SMOOTH WATER FLOW

Best in class Neopperl Aerators gives a soothing water flow.

RESISTANT TO RUGGED OPERATIONAL CONDITIONS

Our faucets works smoothly even at **higher temperature** (85 degrees) and in various **pressure conditions** (0.5 to 5 bar).

IMPECCABLE STRENGTH

High quality brass ingots with upto **60% of copper** content ensures higher level of strength.

CARE FOR YOUR HEALTH

High quality brass with optimal proportions of copper and zinc aids in health benefits.

* Varies for each product

CRAFTING ELEGANCE AT THE HIGHEST STANDARDS

Crafted with enduring quality, superior craftsmanship, and timeless style, Birla Pivot Bathware collection stands as a testament to our commitment to excellence.

■ FOUNDRY

- Induction furnaces, core shooters, and gravity die-casting machines from Italy maintain top-tier production standards.
- Virgin brass ingots are melted and die-casted to precise specifications, meeting material standard IS-292/1983.

■ CASTING

- High-speed computer-controlled SPMS CNC machine centers ensure precise shaping.
- Brass spindles crafted from extruded brass rods on automats (traubmachines) CNC's and IVMC's adhere to Standards IS-407/1981, guarantees durability.

■ SURFACE FINISHING

- State-of-the-art grinding and polishing machines ensure impeccable finishes.
- Electroplating with nickel thickness of 10-12 microns and chrome > 0.3 microns provides resilience to extreme conditions.

■ ASSEMBLY AND TESTING

- Rigorous testing under hydraulic and pneumatic pressure confirms compliance with BIS and international standards.
- Integrated honeycomb laminar structured aerator prevents lime buildup, ensuring consistent performance and water conservation.

■ PACKAGING

- Carefully packaged with cotton pouches, foam, thermocol, and bubble sheets for transit protection.

INSTALLATION AND MAINTENANCE GUIDELINES

At Birla Pivot, we strive to provide true value to our customers. To get the most out of our products, following a few guidelines would significantly improve performance and enhance durability.

DURING INSTALLATION

- Utilize 25mm pipelines instead of 20mm to optimize water flow efficiency. Ensure pipelines are laid straight and vertical whenever possible to enhance performance.
- Minimize the number of bends in pipelines to prevent water pressure throttling. All supply lines should incorporate vent pipes to facilitate smooth water flow from fittings.
- Maintain a center-to-center distance of 165mm for Hot & Cold inlet pipe fittings of all types of wall-mounted mixers, ensuring hassle-free installation of our wall mixers.
- Position the outlet point in the overhead tank at least 2.5cm above the tank's ground level to prevent the ingress of foreign particles, such as sand, into the fittings, safeguarding the working parts from potential damage.

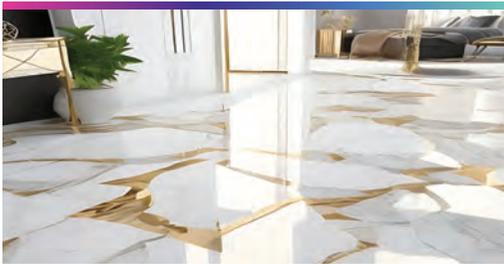

MAINTENANCE & CARE

- Shield taps with poly packs before or after installation to preserve their fine finish and protect against dirt, stains, and damage until they are put to use.
- Avoid harsh cleaning agents containing abrasives and acids; opt for a soft sponge or wet cloth with soapy water or diluted vinegar to maintain the color finish.
- Regularly clean the aerators provided in the fittings to ensure a consistent flow of water. To clean the aerator, remove it, knock out the silver insert, and rinse thoroughly with water.
- Conduct a thorough cleaning of the overhead tank before water supply commences. Regular cleaning of the overhead tank is recommended to prevent the deposition of foreign particles. Install a jali to prevent the passage of any foreign materials through the taps.

MORE FROM THE BIRLA PIVOT COLLECTION

Introducing our complete range of Birla Pivot Tiles and Ply collection. Crafted under stringent quality control measures, our comprehensive range of products is synonymous with superior materials and precision manufacturing. Catering to diverse projects spanning residential, commercial, retail, institutional, and infrastructure sectors, our nationwide delivery network ensures seamless access to superior solutions.

BIRLA PIVOT Tiles

800+ patterns & shades across Ceramic, GVT, Designer & other tiles

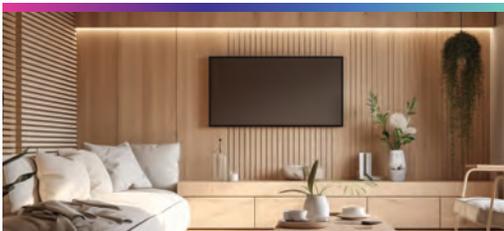

Cutting-edge manufacturing technology using SACMI, Simola

IoT-enabled temperature control for durability

Top-quality Italian and Spanish inks (Sicer and Esmalglass)

Stringent quality control, batch wise testing

BIRLA PIVOT Ply

Made from carefully selected hardwood

BWP grade, wide thickness range

IS 710 and IS 303 standard

Up to 25 years warranty*

Borer and termite proof

E-0 emission levels

High bonding strength
